Education

University of British Columbia Vancouver, BC

Bachelor of Commerce – Combined Major in Business and Computer Science (BUCS) *Expected Apr 2028*

Relevant Coursework: Algorithms & Data Structures, Software Construction, Computer Systems, Models of Computation

Technical Projects

jobhunt | *Python, Pydantic, Anthropic Claude API, SQLite, pytest, Oracle Cloud* Jul 2026 – Sep 2026

- Built a Python CLI integrating 5 ATS APIs (Greenhouse, Lever, Ashby, Workday, Amazon) through pluggable adapters, scanning **200+ companies** every 30 minutes
- Screened postings via Claude API with hard cost caps, rate limits, and retry/backoff, holding spend **under $5/mo**
- Designed a SQLite dedup store and freshness gate, guaranteeing **zero duplicate** alerts across thousands of postings
- Cut scan time ∼2–4× with bounded thread pools; added a daily health-check heartbeat for liveness monitoring
- Validated with **89 passing pytest unit tests**; runs 24/7 on an Oracle Cloud VM via cron with lockfile/timeout guards

Mushu Kwok AI | *Python, FastAPI, LangChain, Groq, ChromaDB, ONNX, React* Jan 2026 – Mar 2026

- Designed and built a full-stack RAG chatbot integrating a React client, FastAPI backend, and Groq LLM API, retrieving context from a curated corpus about my real-life dog to answer as him in **under five seconds**
- Cut deployment image size by **83% (5.7GB to under 1GB)** by replacing HuggingFace/torch with ONNX runtime, speeding CI/CD deploys to Vercel and Railway
- Implemented a LangChain ingestion pipeline into ChromaDB with ONNX embeddings, and streamed Groq tokens to the client in real time over Server-Sent Events
- Hardened pipeline against prompt injection through validated chat payload, retrieved chunks, isolated RAG context

UltimateFrisbee Coach Tracker | *JavaScript, Node.js, Express, EJS, MongoDB, CSS* Jan 2024

- Built a full-stack coaching platform with a **live in-game stat tracker** for real-time data entry during games
- Designed the MongoDB schema and workflows supporting player management, per-game versus cumulative stats, and side-by-side player comparisons
- Built RESTful routes for player and game CRUD operations and live stat updates on a Node.js/Express server
- Deployed on Render with a Node.js/Express backend and EJS frontend

Experience

TD Canada Trust May 2025 – May 2026

Customer Experience Associate *Vancouver, BC*

- Partnered with advisors on personalized client referrals, generating **$1.2M+** in investments and **18%** branch growth
- Authenticated clients and upheld KYC/AML and banking privacy regulations, supporting compliance audits and testing
- Earned a **100% customer score** in 2026 through clear, concise client service in English, Cantonese, and Mandarin

Awards

First Place, Product+ 2026 Oct 2026

UBC BizTech 2026 *Vancouver, BC*

- Won first place out of 29 teams and 150+ competitors in an SAP-sponsored product case
- Pitched and prototyped an AI agent that pre-positions pharmacy inventory ahead of flu-season demand surges

National Champion, Dyno Open, Prime Ultimate Club Aug 2024

Canadian Ultimate Championships *Ottawa, ON*

- **Won the national title undefeated** competing against 24 teams across 520 players

Technical Skills

Languages: Python, JavaScript, Java, C++, SQL

Frameworks: React, Next.js, Node.js, Express, FastAPI

Cloud & Tools: Git, Linux, Oracle Cloud, MongoDB, SQLite, pytest, Claude API
